Objective: Pipe Fitter Supervisor

Summary Fifteen years of progressively responsible pipe fitting experience. Trained and evaluated 6 apprentices in the layout, assembly, installation, and maintenance of pipe systems and hydraulic pneumatic equipment. Modified speed and motion of automated robots and conveyors.

Experience

Greene Construction Engineering
Pipe Fitter

San Mateo, CA
June 1997 to June 2011

- Laid out, assembled, installed and maintained pipe systems, pipe supports and related hydraulic and pneumatic equipment for such industrial systems as heating, cooling, lubricating and interior sprinkling to prevent or put out fires.
- Selected type and size of pipes and related materials and equipment, such as supports, hangers and hydraulic cylinders, based on blue prints on job order specifications.
- Inspected work sites to determine presence of obstructions and to ascertain that holes cut for pipes would not cause structural weakness.
- Cut, threaded, bent, assembled and installed both metal and non-metal pipes and tested integrity of pipe systems.
- Installed and maintained refrigeration and air-conditioning systems.
- Modified programs of automated machinery, including robots and conveyors, to change their speed and motion.
- Trained and evaluated apprentices.

Roseville Plumbing and Piping
Pipe Fitter Apprentice

Roseville, CA
June 1994 to June 1997

- Under direction of pipe fitter, learned to work from blueprints, to use all pipe-fitting tools and machinery and to work with iron, steel, copper and plastic fittings.
- Independently performed less complex work, including cutting, threading and bending pipe.
- Assisted in performing more difficult work, such as installing and maintaining refrigeration systems and hydraulic and pneumatic machinery components.

Education

High School Diploma; Coolidge High School
Earned 3.4 grade point average.
